

Homework 5

Docker Hub is a hosted repository service provided by Docker for finding and sharing container images with your team. Key features include: Private Repositories: Push and pull container images. Automated Builds: Automatically build container images from GitHub and Bitbucket and push them to Docker Hub. Subject of your homework is how to use Docker Hub and how to create repository in Docker Hub. The deadline for submission of the assignment is May 8, 2025 23:59. You have to submit two submissions.

- 1) Docker Hub account (username and password) that you registered and created repository in Docker Hub.
- 2) Public view of your repository like https://hub.docker.com/r/gokmem/cloud_solutions (**1 points**)

Additional Requirements;

- Sign in Docker Hub.
- Create a repository which name is cloud_solutions (**1 point**).
- Type of created repository should be public type (**1 points**)
- Edit *Repository description* which should be contain your name and surname (**1 points**)
